European prohibition of sale for measuring instruments containing mercury

Dear BIODUR® customers,

Following the requirements of Regulation (EU) No 247/2012, amending Regulation (EC) No 1907/2006, Annex XVII, measuring instruments containing mercury intended for industrial and professional uses such as barometers, manometers, or thermometers, shall no longer be placed on the European market. Our Bennert Manometer (item no HI13A1.0), proven in plastination for decades, unfortunately is affected by this regulation, therefore, our upstream suppliers ceased manufacturing these instruments.

In view of the above, Bennert manometers are no longer available for our European customers. Hence, our sales department will replace the Bennert manometer by a digital manometer when elaborating a quotation on laboratory equipment.

BIODUR® customers outside Europe are requested to check the national and regional legislation in their country before ordering a Bennert manometer. For a certain period of time we will be able to keep our delivery capacity by selling off our warehouse stock. Only after that, Bennert manometers won't be available any more.

We ask for your understanding and hope that you will continue to rely on BIODUR® Products as your supplier for chemicals, equipment and auxiliaries for plastination.
